

TAS Pathways

Students attend Career Days at Universities (Year 9 – 12)

Internships are available for Year 12 students to undertake should they wish to delve deeper into the understanding of a chosen career pathway.

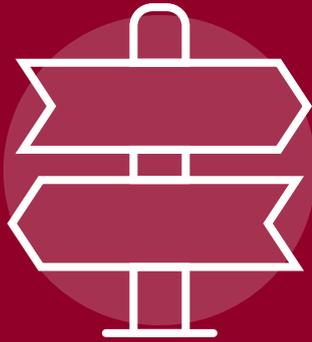

USQ Head Start

The University of Southern Queensland offers a variety of first year subjects for students to undertake during Year 10, 11 and 12.

Students undertake these courses with other first year University students, studying the same curriculum and assessed similarly.

Many students **combine a more traditional academic load with a certificate course** that is accessed externally. Some of the VET (Vocational Education and Training) courses can start from Year 10.

There are many ways to gain experience and knowledge rather than the traditional schooling structure. Many of our **students are willing and excited** about learning things beyond the standard Australian Curriculum.

Many of these areas are integrated into the Secondary Years curriculum, whereas others are facilitated by outside expertise.

Gateway to the Future

Each year under the Thrive Program students will take part in a variety of programs **designed to develop higher order thinking with new real world skills**. These activities not only complement and support the curriculum but also go beyond the classroom to give the students extra real world experiences.

Year 7

Learning to Lead and Inspiring Change
Robotics, Short Circuits and the Future

Year 8

Leading from Behind
Shark Tank Challenge

Year 9

Jobs, Income and Life
First Home Buyer to Retirement

Year 10

Australian Business Week
Work Experience
Gateway Camp

Diploma of Business

Students who wish to continue studying Business at the tertiary level may choose to undertake a Diploma of Business in Years 11 and 12. The training provider that our students undertake this course with has **partnered up with universities** where students get direct entry to appropriate courses in these universities.

TAFE

TAFE or a School-Based Apprenticeship allows students to **train towards a recognised qualification or apprenticeship** and work for an employer while completing high school studies.

AMEB

Another way to **secure rank points for tertiary study** is to successfully complete up to a certain grade in Music, Speech and Drama and Dance examinations.

Distance Education

Not only does TAS offer a broad range of senior subjects, but there is facility for students to be able to complete subjects not offered within the timetable through **Distance Education**. The School would be able to support the student via timetable allowances, resources and mentoring.
